## SOIL STABILIZERS, BINDING AGENT, WATER/EMULSION SPREADER WITH SINGLE PRIME MOVER, SIMULTANEOUSLY

# and wetting in one process:

SBF-24-6 Soil Stabilization grinder and the SBS

Bonding agent spreader solves one of the biggest problems in soil stabilization work: When used as bonding agents, lime and cement are very effective bit also relatively harsh & caustic. This makes it almost impossible to stabilize soil near residential areas, traffic, parked cars and airports, specially in windy weather when the spreader binding material will be blown away when spreading from Open truck mounted spreaders.

#### **Fuel Efficient**

The high energy efficiency, economical fuel consumption as well as low pollutant and noise emissions always play a major role in the Stehr machines. With over 50 % less fuel compared to conventional machines, payback is achieved by the fuel savings alone. One single prime over to do 3 jobs simultaneously.

## **Drive Concept & Energy saving**

Stehr W

The power from the tractor's PTO shaft to the cutting rotor is not transmitted, as is usually the case, via power-absorbing side spur gears, but via power belts arranged on both sides, which run at high speed and therefore only have to transmit a relatively low torque. Torque build-up is only achieved via the planetary gear when the torque is needed: in the cutting rotor The lateral chain drive is very narrow compared to spur gears. This is very important because the housing of the side drive is pulled through the soil in the lower area. The narrower the side drive, the less power is required.

It also stores enough data of daily

production in its memory.

2.4m Grinding unit

## **SBF 24**

### **Grinder Unit:**

Cutting Width: 2,400mm Cutting Depth: 500mm Weight: 4,550 Kg.

Rotor: 800mm

Rotor Speed: 310 rpm/min

Drive: PTO shaft.

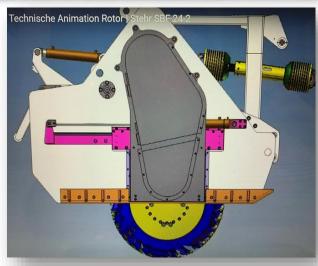

PTO Speed: 1000 rpm/min.

Power Requirement depending on cutting Depth: 230HP to 308 HP Single Spray Bar for Water/ Emulsion..

## **GRINDING & MIXING UNITS**

DESIGNED FOR MANUAL & COMPUTER CONTROLLED OPERATIONS. HEAVY DUTY CONSTRUCTION WITH HIGH QUALITY WEAR RESISTANT TOOLS.

SIMPLE......VERSATILE......ECONOMICAL

## STEHR SBF-24 & SBF 24-6 WORKING

ANALYSIS PER DAY IN CU.M (Depending on average soil conditions)

#### STEHR WORKING ANALYSIS PER DAY IN CU.M

#### For Soil Mixing (CMS) or Working with Soil

Working /Hour	Length	Met Width.	Meter Depth.	Meter Diesel Consume L/Hr Working per day (8 Hours)	Cu.m
1		400	2.4	0.25 15-20	1920
1		200	2.4	0.45 25-30	1728

#### For CTGSB or Working with GSB

Working/Hour	Length	Meter Width	Meter Depth	Meter	Diesel Consume L/Hr. Working Per day (8 Hou	rs) Cu.m
1		300	2.4	0.25	35	1440
1		125	2.4	0.4	40	960

For Working with	h WMM									
Working/Hour	Length	Meter	Width.	Meter	Depth	Meter	Diesel Consume L/Hr	Working Per Day (8)	Hours))	Cu.m
1		400		2.4		0.25	25			1920
1		250		2.4		0.4	35			1920

Note: The above calculations are a general idea on the output, operation cost and construction savings. The same will change from site to site and various climatic conditions.

## Completed projects in India

NH - 206 Karnataka

NH - 34, West Bengal

NH- 60, West Bengal

NH - 215, Orissa

Forest Road, Uttarakhand

SH - 45, Uttarakhand

Rural Road Champawat, Uttarakhand

Rural Road, Tripura

THE PRIME MOVER

#### AUTOMATIC CLIMATE CONTROL AND OPENING ROOF HATCH

A highly-efficient automatic dimate control integrated into the cab roof distributes air throughout the cab via strategically positioned vents maintaining the desired in-cab temperature whatever the outdoor weather conditions.

The automatic climate controls are conveniently built into a stylish roof console. An opening

#### BLUETOOTH RADIO

The Bluetooth radio enables listening to music also through an MP3 player, an AU3 cable or a USB flash drive, while an integrated microphone allows the operator to make hards free phone calls.

#### IN-CAB STORAGE COMPARTMENT AND BOTTLE HOLDER

A refrigerated in-cab storage compartment is located on the driver's left, while a practical bottle holder is conveniently placed on

## compacting- soil stabilizationbinder spreader-levellingtrench cutting-manhole cutter

## **MANHOLE CUTTER**

The ultimate levelling machine for t he maintenance and construction of gravel roads. The crease blade invented by Stehr can be used to produce all road construction profiles. It is also possible to install a crown with one run

### **TRENCH CUTTERS**

For Digging, laying & filling back soil To lay optic fibre cables at the rate of 1 kms per hour.

### STEHR SBS 6000

Binder volume: 6 m<sup>3</sup> Weight: 2460 kg Width: 2610 mm Height: 2675 mm Length: 3750 mm

spread width: 2400 mm / 1200 mm

(hydraulically halved)

Tractor: from 80 HP

**SBS 10** 

#### STEHR SBS 10

Binder volume 10 m3 Weight: 3670 kg. Width: 2665 mm Height: 3190 mm Length: 4775 mm

Spread width: 2400 mm / 1200 mm (to be

hydraulically halved)

**Tractor: from 130 HP** 

### Main Technical & Salient features:

## Fill Level check: optical with electronic sensors.

- Trailer with hydraulically adjustable hitch and compressed air brake.
  - No conveyor belt, no screw conveyor, no bridging.
- Dust filter: the blowing air escaping during filling is cleaned via a dust filter developed by Stehr. This is easy to clean and maintenance-friendly
